XILIA
WOOD EXPERIENCE

XILIA, WOOD THAT MOVES SPACES

THE ITALIAN SMART COMPANY OF THE ECO-TACTILE WOOD: WE ARE XILIA

With Xilia, the wood takes on a new dimension, the tactile one, in order to create unique and sustainable surfaces enriched with exclusive textures which become refined solutions for the interior design.

Xilia introduced a new perception, which is material and sensorial, to a complex surface such as wood. Thanks to a production process capable of combining artisan manual skills and technology, the wood comes out embellished by stunning textures through which the surface takes shape, movement and personality.

A TRUE STORY OF FRIENDSHIP AND THEIR PASSION FOR WOOD

Xilia is the story of 3 friends and their deep love for wood and design, accompanied by a passion for beauty and what is well done.

3 friends with an extremely heterogeneous background but with the ambition to write a new successful page on the Italian design scene: creating a smart company with a business model open to contamination able to offer unique wooden surfaces and solutions, beautiful to look at and to touch.

This is the true essence of Xilia.

WHAT WE VALUE THE MOST

Craftmanship Innovation /

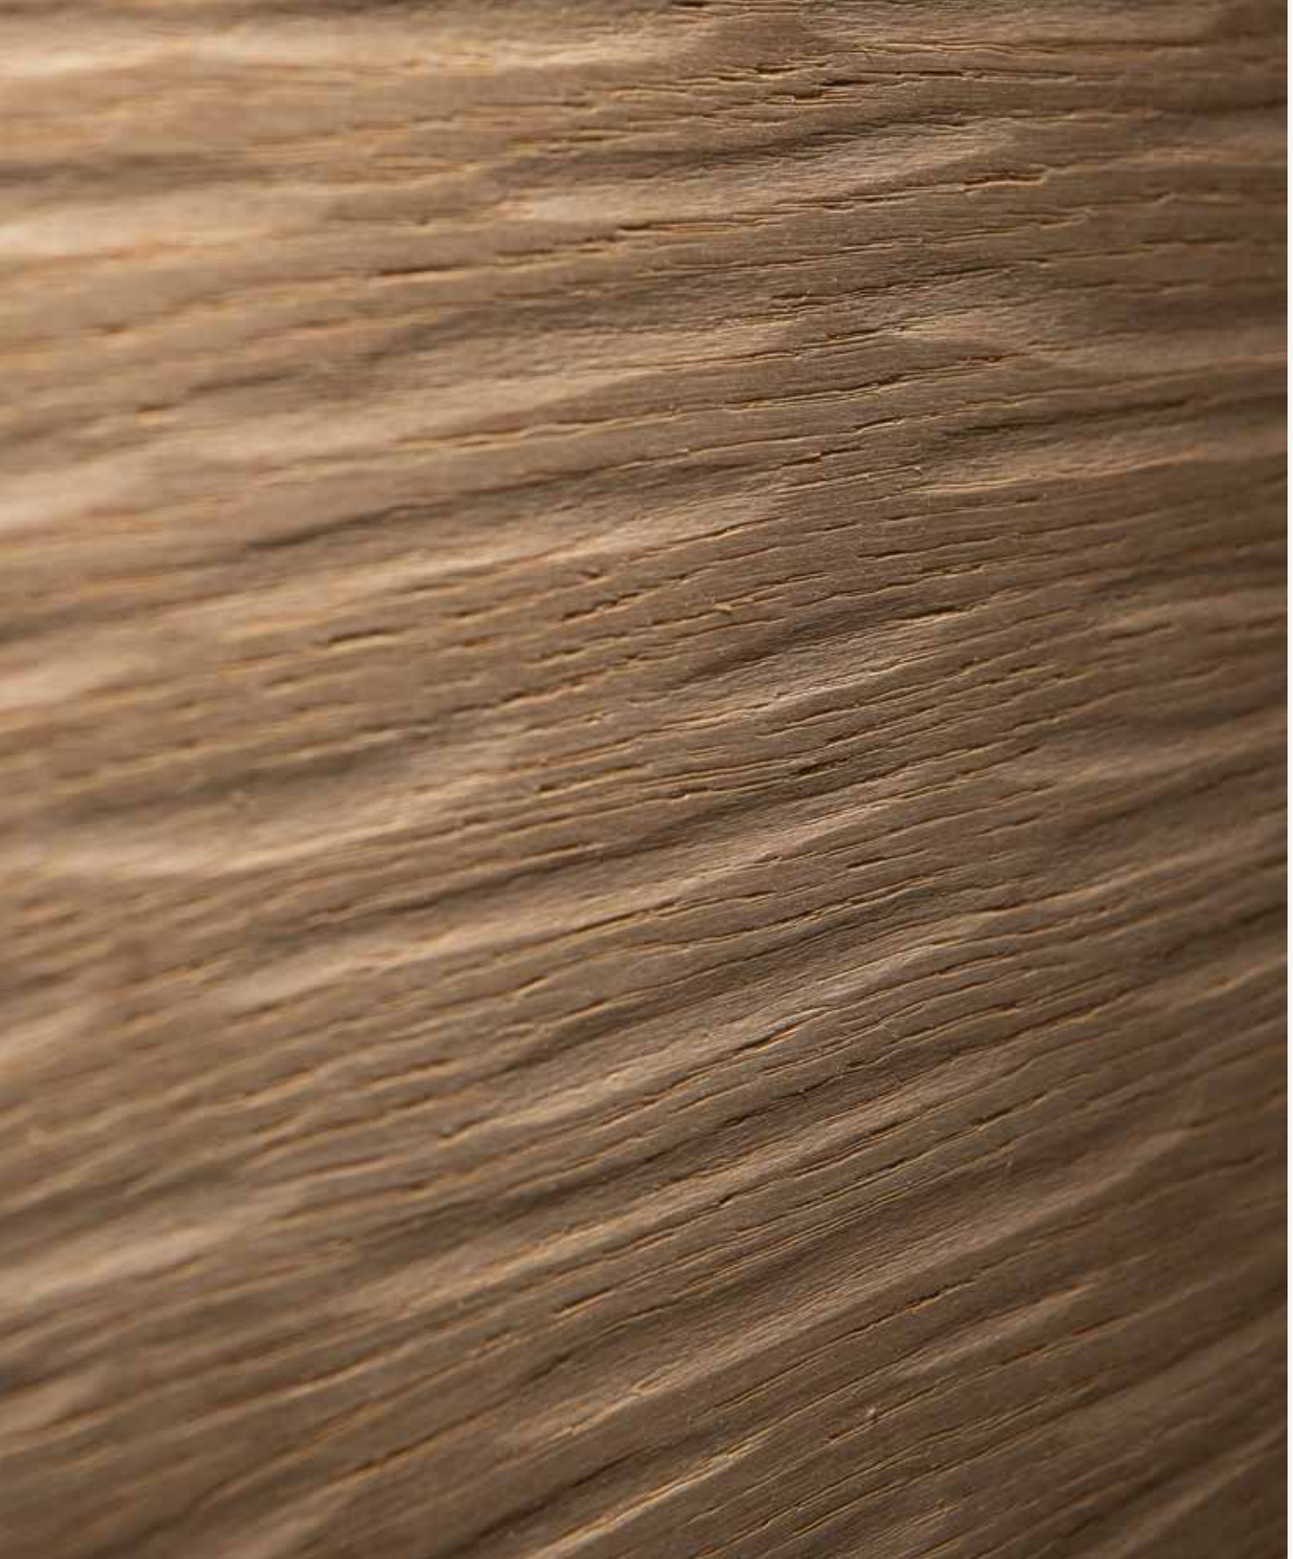
Xilia proposes unique and rare wood surfaces based on high quality raw materials, giving an extraordinary visual and tactile sensation on very low veneer thicknesses

Sustainability /

All Xilia products are proposed with water base painting and FSC certification in full respect for the environment and with a special eye for future generations

Made in Italy /

Xilia is located in the heart of Venice furniture's & design district carrying values and the qualities of the most beautiful "Made in Italy"



UNIQUE TEXTURES FROM THE DEEPEST ESSENCE OF WOOD

In this acutely digital age, we have a primary need to surround ourselves with surfaces that thrill our fingerprints.Thanks to our proprietary technology we create unique textures that give to the wood a new tactile and sensorial experience.

The result is a pleasant touching surface where a natural feeling and exclusive appearance of the wood are perfectly balanced.

Welcome to the new era of wood touch experience!

Unique textures /

SAND

An exclusive tactile sensation, as if the surface were blown with fine grains of sand.

SAW

The microporous surface is furrowed crosswise by more or less regular marks that convey a highly tactile and 'aged' look.

SOFT TOUCH

Light waves like the sea at sunset for a truly chill-out sensational tactile perception.

WAVE

Very smooth nicks, like sand dunes, give a wavy look to the wood.

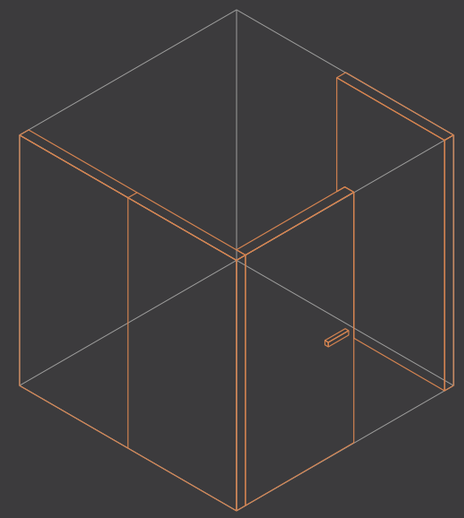
LIGHT BRUSH

A delicate tactile effect, which naturally opens the wood's pore and shapes it in full compliance with the different surface densities.

DEEP BRUSH

A decidedly intense tactile effect, which naturally opens the wood's pore and shapes it in full compliance with the different surface densities.

AN INFINITE RANGE OF APPLICATIONS FOR ALL INTERIOR DESIGN NEEDS

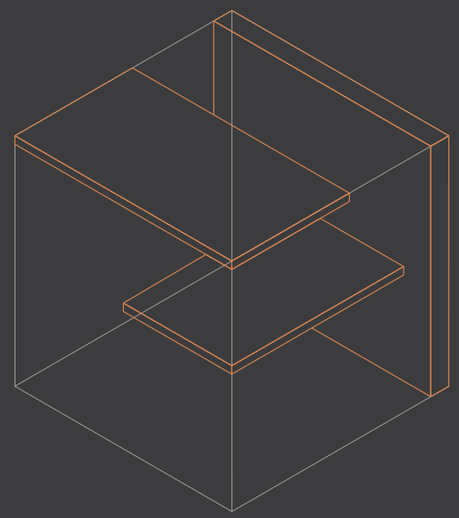


Architectural Systems /

THE INNOVATIVE ROOM CLOSING SYSTEM MADE WITH CUSTOM DOORS AND DECORATIVE ELEMENTS, THAT FITS PERFECTLY WITH ANY TYPE OF PARTITION

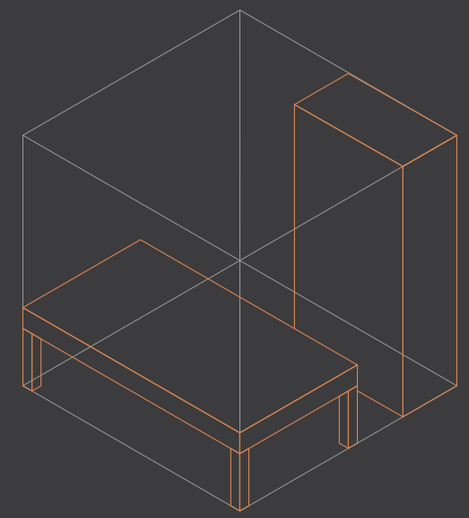
Smart Panels /

THE FUNCTIONAL AND VERSATILE PROPOSAL OF READY TO USE DECORATIVE PANELS FOR WALL COVERINGS, CEILINGS AND FURNISHINGS



Design Elements /

UNIQUE OBJECTS AND FURNISHINGS WITH A GREAT PERSONALITY THAT COMBINE AESTHETICS WITH FUNCTIONALITY



A SURFACE CENTRIC END-TO-END APPROACH FOR ARCHITECTS, DESIGNERS AND GENERAL CONTRACTORS

The versatility of production, but above all the flexibility of thought, allows Xilia to develop tailor made proposals that can enrich the project, interpreting its spirit through a precious and often unprecedented formal language, in line with every type of request expressed by the client.

Xilia cover all the project phases, from design to installation, and serves the most important brands in the fields of furnishing, product design, interior architecture and contract, with projects ranging from hotels to multi-apartment complexes, retail and public spaces.

STUNNING INTERIOR DESIGN SOLUTIONS

Ability to extract the truest essence from each wood to enhance it and expand its possibility of use in any kind of project.

INNOVATION AND CRAFTSMANSHIP FOR THE WORLD OF PROJECT

Deep knowledge, meticulous attention to detail, rigorous control of every stage of the process.
