Personality /

WE ARE THE ITALIAN SMART COMPANY OF THE ECO-TACTILE WOOD

We are committed to giving a new dimension to interior design, a tactile one. Xilia surfaces enhance our perception of spaces, turning creative ideas into smart, functional and sustainable products with great aesthetic appeal. So that we can appreciate wood in a harmonious environmental balance.

Each surface created by Xilia represents what we believe in and expresses the same basic requirements: innovation, attention to detail, qualitative research and respect for the environment.

Our passion for innovative materials and technologies always drives us to explore and experiment in order to overcome the limits imposed by materials and propose new solutions featuring a distinct sensory component.

We strive to stimulate the imagination and offer a new perception of spaces in the furniture, product design, interior design and contract-furnishing sectors.

THREE DIFFERENT BACKGROUND, ONE UNIQUE VOCATION

Xilia is the story of three friends who share a love for wood and a passion for design and the unconventional. The merging of different professional backgrounds has enriched an ambitious, and fascinating dream with ideas, relationships and experiences: to give life to a smart company with a strong vocation to sustainability, able to explore new areas and form of expression in the world of wood surfaces for the interior design.

More than a company, Xilia is a creative laboratory open to collaboration, that overturn the constraints of production logic to offer be-spoke design solutions that fully exploit the expressiveness of the material.

VALUES WE BELIEVE IN: OUR DAILY COMMITMENT

Craftsmanship / Innovation /

We believe in technology as a creative opportunity, not a constrain. This is why our lean production process goes beyond the boundaries of seriality and guarantees the quality of an artisan product with the timing and logic of management of an industrial product.

Safety as a standard /

Our concept of sustainability aims as both at the longevity of our products and at the safety of our surfaces. Companies are increasingly asked to take a position on these issues, and Xilia has placed them as a fundamental principles of its commitment to future generations.

Search for well-being /

We have a simple motto at Xilia: if it's useful and beautiful, then it's design. This is why we don't just look at the aesthetics of our products, but also at the well-being that is generated by their use. A form of respect for people, a way to find nature, serenity and inspiration in the spaces in which they live.

A WORLD OF SENSATIONS IN THE PALM OF YOUR HAND

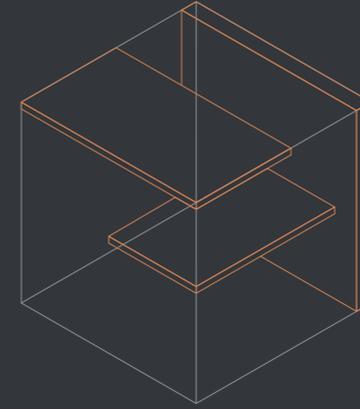

Slight streaks, obvious furrows, delicate or more pronounced wood grain, where light is captured and reflected, create chiaroscuro effects and bas-reliefs with a compelling design. The ultimate goal of all our work is to convey an emotion that immediately involves our senses.

We should not only see wood but, first and foremost, touch it. The multisensory nature of Xilia wood surfaces is expressed in a range of exclusive textures, designed to enrich the way we interact with the spaces around us.

The resulting surfaces combine warmth with the unique aesthetic appeal of solid wood and the advantages of veneer.

CREATIVITY IN A PROJECT-DRIVEN APPROACH

Xilia products are designed to satisfy an infinite range of applications and offer solutions that adapt with a creative impulse to the most sophisticated interior projects.

Smart Panels /

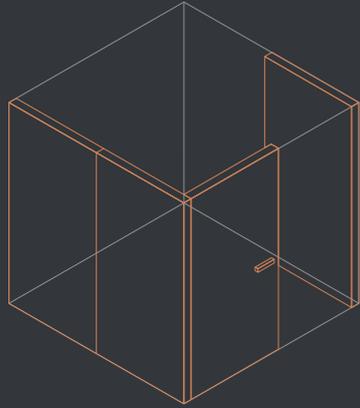

DECORATIVE SURFACES FOR INTERIOR
DESIGN PROJECTS AND PRODUCTS

Xilia Smart Panels is the functional and versatile proposal of decorative panels for the interior design, architecture and contract industries. Company Profile

XILIA Wood Experience

NATURE INSPIRES DESIGN, DESIGN SHAPES SPACES

We think of Xilia as a “wooden dressing company”: a different way of perceiving the processes of the woodworking industry. Ours is an end-to-end approach that has as its fulcrum the wooden surface, around which an integrated and collaborative supply chain revolves, managed with a lean and dynamic model.

A thinking and operational flexibility that becomes the basis for us to develop highly bespoke products, maximizing each project phase, from research to design, from production to installation.

We are proud to define sustainability as a fundamental principle of our business. We comply with the strictest international green building standards to ensure that our surfaces are products for life.

WE CAN BE ENGAGED INTO THE ENTIRE PROJECT LIFECYCLE, FROM THE DESIGN PHASE UP TO INSTALLATION

Research /

- Veneer selection
- Development of custom finishing
- Dedicated team to certifications requirements
